Customer Review Report

Faculty Name: Thippeswamy sir

1. Frequency of Course Structure Updates

Course structures are generally updated once per academic year or whenever there are significant changes in industry trends or market requirements. The updates are typically subject-specific and depend on the nature of the course, such as whether it is coding-oriented or theory-based.

2. Responsibility for CO-PO Mapping

The Course Outcome–Program Outcome (CO-PO) mapping process is conducted collaboratively by:

- University faculty
- Industry experts
- Members of the Board of Studies

The finalized structure is further reviewed by alumni to ensure relevance and practical applicability. However, when handled by an experienced expert, fewer stakeholders may be involved, as less guidance and iteration are required.

3. Time Required to Design a Course Structure

- From scratch**:** Approximately 8 working hours spread over 3 days
- For experienced faculty: Around 8–12 hours of engagement on average

This indicates that expertise significantly reduces the time and effort required in curriculum design.

4. Key Priority in Course Structure Design

The most critical factor in designing a course structure is its relevance. The curriculum must:

- Align with current industry standards
- Reflect market demands
- Ensure practical applicability for students

5. Review and Approval Process

- For an expert, typically one round of review is sufficient for approval.
- For an average faculty member, it may require 2–3 rounds of review, especially if substantial revisions are needed.

This highlights the importance of expert involvement in improving efficiency and quality.

Pain Points Identified

Difficulty in determining the relevance and quality of the generated course material

Feedback and Recommendations

1. A minimum of five reference sources should be used to improve the quality and reliability of course design.
2. Curriculum design should not rely solely on previous structures but must also include benchmarking against top-tier and reputed institutions, such as:
    - VTU
    - IITs
    - IIITs
    - NITK
    - Other recognized regional institutions
