CUSTOMER Review Report

Faculty Name: Shivalingappa Sir

INPUTS FROM OUR CUSTOMER

1. Frequency of Course Structure Updates

The course structure is updated frequently based on evolving academic and industry requirements. Changes in market trends are incorporated into the curriculum, and the frequency of updates varies depending on the subject. Overall, the course material is regularly revised to remain aligned with current industrial standards.

2. Faculty Involvement in Material Updates

The updation process involves multiple faculty members, including senior professors, ensuring both academic depth and quality.

3. Textbooks Used for Course Design

Course material is designed using a primary textbook along with one or more reference materials to ensure comprehensive coverage of the subject.

4. Engagement Hours for a 3-Credit Subject

A 3-credit subject involves up to 40 hours of engagement. This corresponds to approximately 12–13 hours of engagement per credit.

5. Tools Used by Professors

Professors utilize a combination of previous years' materials, expert advice, inputs from industry experts, and AI-based tools to enhance teaching effectiveness.

PAINPOINT

In the current educational scenario, it is highly important to update the courses regularly to be in line with the changing industry requirements. However, in large-scale universities like VTU, it is not always easy to adapt to such frequent updates due to structural constraints.

Further, the process of mapping COs with POs and then mapping them to Bloom's Taxonomy is also a tedious one, as it demands at least 15 days as per university guidelines.

CONCLUSION

Thus, our model is highly advantageous as it helps to reduce the workload and be more efficient in adapting to the changing industry requirements
